Projects

Property Count Scraper

Worked with a national company to develop a web scraper using Python for gathering total property counts from an extensive list of vacation rental websites.

A-Life Challenge 2.0

Worked in a small development team to create a modifiable artificial life simulation in C++/C#. Functioned in both leadership and development on UI implementation.

The Lord of the Rings Wiki

Worked with another developer to create a website which catalogues *The Lord of the Rings* universe. Focused on implementing a SQL database backend with a robust HTML website front-end.

Experience

Against | May - August 2024

Served as an intern for a Boise-based creative services company. Designed website and digital materials for local and national clients. Provided target marketing analysis for client team and engaged in advertising and marketing presentations.

MX.CO Freelance Design | Ongoing – began April 2020

Worked as a freelance designer to create a variety of design solutions under commission within set timeframes. Communicated with clients to provide design iterations to meet expectations. Managed an online store through RedBubble to sell a variety of designs.

Cross Town Movers | June – September 2021 -2024

Operated a work truck under a company CDL to load and move customer property between homes, businesses, and offices within expected timeframes. Managed communication between daily crews and a central office, as well as transactions with customers.

Honors & Awards

Dean's List | Oregon State University | Spring 2023

Outdoor Leadership Award | Riverstone International School | June 2020
